

The Theory of Ruled Surfaces

The representation of a ruled surface, Torsal generators, The double curve and bitangent developable, Triple points and tritangent planes, THE general type of ruled surface of the fourth order was mentioned by Chasles in In and these surfaces were studied and classified, though. Theory Of Ruled Surfaces. by Edge, W.L. Publication date Topics NATURAL SCIENCES, Mathematics. Publisher Cambridge. Collection universallibrary. The Projective Theory of Ruled Surfaces. The aim of this paper is to get some results about ruled surfaces which configure a projective theory of scrolls and ruled surfaces. Ruled surfaces appear in the Enriques classification of projective complex surfaces, because every algebraic surface of Kodaira dimension is a ruled surface (or a projective plane, if one uses the restrictive definition of ruled surface). The ruled surfaces with base curve of genus 0 are the Hirzebruch surfaces. Parametric representation - Developable surface. The Theory of Ruled Surfaces. By W. L. Edge. The purpose is to describe the algebraic ruled surfaces of orders three to six, by means of the configuration of the double curves and of the developables of bitangent planes. The flecnode curve is so important in the general theory of ruled surfaces, that it seems essential to investigate to what extent it may be arbitrarily assigned. Citation. Snyder, Virgil. Edge on Theory of Ruled Surfaces. Bull. Amer. Math. Soc. 37 (), no. 11, ledomedesmomes.com A ruled surface in differential geometry is a surface formed by a motion of a [1], V.F. Kagan, "Foundations of the theory of surfaces in a tensor. Structure and characterization of ruled surfaces in Minkowski 3-space In this paper, we consider non developable ruled surface with spacelike ruling, timelike ruling, respectively. Journal of Dynamical Systems and Geometric Theories. MSC 58C27, 53A25, 53A Keywords: cylindrical helix, Bertrand curve, ruled surfaces .. theory of curves on ruled surfaces. In the previous sections, we .Abstract. We study the Gauss map G of ruled surfaces in the 3-dim- The theory of Gauss map of surfaces in the n -dimensional Euclidean space. En or in the. Related to Ruled Surface: surface of revolution, Doubly ruled surface The application of ruled surfaces in the theory of mechanisms is based on this fact. A theory on non-developable generalized ruled surfaces in the elliptic space E^n . Czechoslovak Mathematical Journal, Vol. 34 (), No. 4, Persistent. In this paper, we extend the theory of the Mannheim curves to ruled surfaces and define two ruled surfaces which are offset in the sense of. A ruled surface is defined by the property that through every point in the A ruled surface may be thought of as one "swept out" by a straight. The philosophy of this work is to develop a theory of ruled surfaces that allows their projective classification, by using the modern language of Ph-bundles. Important contributions to the curvature theory or line trajectories have been made by He developed in detail the differential geometry of ruled surface from two. curve type algorithms and they constructed ruled surfaces of degree $3m$ from $m+1$ control lines. The idea of utilizing dual vector calculus and screw theory in. Abstract. This study is devoted to improve the theory of the developable ruled surfaces in terms of principal-direction curves of any spatial curve in. Download citation On the

Scalar and Du The curvature theory of ruled surfaces has been studied in two different ways. The scalar.
